New features

This release contains no new features.

Changes in Functionality

This release contains no functionality changes.

Changes to third-party libraries

The Apache POI library was updated to version 5.2.2.

Closed Issues

This release contains the following closed issues:

- **[ADIX-3501]** When using Dynamic Data Modeling, fields in the Excel sheet are generated under the wrong table.
- **[ADIX-3537]** [API] Notify users when an unsupported import mode is specified.
- **[ADIX-3572]** An error message lacks information after choosing to download the file containing invalid data during an Excel/CSV import operation.
- **[ADIX-3581]** Data under a multi-value group field is exported incorrectly when this group contains a multi-valued child field.
- **[ADIX-3586]** Excel file cells are incorrectly formatted when exporting numeric fields.
- **[ADIX-3609]** A multi-value complex data type group is not exported when exporting to Excel with the **Export related data** mode.
- **[ADIX-3610]** The column header is not correct when exporting the label for a Dynamic Enumeration with a Null or Empty value.
- **[ADIX-3622]** The link to download a file with invalid data is not displayed when importing Excel or CSV with all import modes except **Update or insert**.

Known Issues

This release contains the following known issues:

- Association object and selection node are not supported.
- Data lineage.
- Graphical view of the data mapping configurations.
- **Split of string** transformation function is not supported for a multi-valued string field.
- Data transfer between complex terminal nodes is possible only if they use the same Java Bean.
- You can not export data from multiple complex nodes in EBX® that when there is at least one complex node with multiple occurrences.

- You can not import data from multiple complex nodes in an XML file when there is at least one complex node with multiple occurrences.
- **Split of data** works for terminal nodes only.

SQL export:

- You can only export data from EBX® to the selected columns in the same tables of a view which is joined by multiple tables.
- The add-on doesn't support exporting SQL with the **Replace all content** mode to a view which is joined by multiple tables.
- Checking mandatory fields of a view in SQL database is not supported.
- The export still executes normally and shows an error message from database when no privilege granted.
- Exporting data from multi-valued fields and multi-valued groups is not supported.
- You can not export data from EBX® to a view in PostgreSQL database.
- Exporting data from EBX® to an auto-increment column in SQL Server is not supported because the **IDENTITY_INSERT** property is always set to OFF.

SQL import: Checking privileges for a view in PostgreSQL is not supported.

Dynamic data modeling: Foreign key statements in the DDL file are not managed.
