Known Issues..... 5

New features

This release contains no new features.

Changes in Functionality

This release includes no changes to functionality.

Changes to third-party libraries

The following third-party libraries were updated:

- The Batik library was updated to version 1.16.
- Guava: Google Core Libraries For Java was updated to version 32.0.1-jre
- Netty/All In One: NIO client server framework was updated to version 4.1.94.Final

Closed Issues

This release contains the following closed issues:

- **[EBXDAMA-2357]** Several icons are not visible and assets cannot be previewed when using the search feature.
- **[EBXDAMA-2426]** Assets are duplicated when uploading a ZIP file created on macOS.
- **[EBXDAMA-2443]** An unexpected pop-up is displayed when deleting unattached assets on the Drive screen.

Known Issues

This release contains the following known issues:

- Searching for assets in the media-type field using quick search is not supported. However, when previewing some file types, such as PDFs, you can search for text within the file.
- The configuration is not updated for the supported file extensions after users access the Digital Asset Manager widget.
- Document previews cannot display Vietnamese text.
- When accessing assets in an external Drive, error messages may display when selecting all assets. This can be the result of access limitations put in place by the third-party tool.
- Thumbnails of some uploaded SVG files do not display correctly.
- Previews of PPT, PPTX, DOC and DOCX files cannot display charts due to a limitation of the library used to generate the preview.
