

TIBCO EBX® Digital Asset Manager Add-on Release Notes

*Version 2.5.5
August 2023*

Table of contents

New features.....5

Changes in Functionality..... 5

Changes to third-party libraries..... 5

Closed Issues.....5

Known Issues..... 5

New features

This release contains the following API updates:

- An option was added to Drive configurations that disables automatic synchronization between the add-on and an external Drive. When this option is disabled, it can help improve performance. You can synchronize manually as needed when viewing the Drive.

Changes in Functionality

This release includes no changes to functionality.

Changes to third-party libraries

The following third-party libraries were updated:

- FasterXML Jackson library was updated to version 2.15.2.
- Swagger JAXRS2 library was updated to version 2.2.15

Closed Issues

This release contains the following closed issues:

- **[EBXDAMA-2460]** An unexpected pop-up is displayed when deleting unattached assets on the Drive screen.
- **[EBXDAMA-2575]** Error uploading an image with extension name in capital letters to digital assets
- **[EBXDAMA-2611]** Assets located in externally managed storage can not be downloaded from the UI.
- **[EBXDAMA-2616]** HTTPS settings can cause thumbnails to not display.

Known Issues

This release contains the following known issues:

- The add-on is not stable when deployed on a WebLogic application server. Fatal errors can occur when trying to use the add-on's services. The root cause is under investigation.
- Searching for assets in the media-type field using quick search is not supported. However, when previewing some file types, such as PDFs, you can search for text within the file.
- The configuration is not updated for the supported file extensions after users access the Digital Asset Manager widget.
- Document previews cannot display Vietnamese text.
- When accessing assets in an external Drive, error messages may display when selecting all assets. This can be the result of access limitations put in place by the third-party tool.
- Thumbnails of some uploaded SVG files do not display correctly.
- Previews of PPT, PPTX, DOC and DOCX files cannot display charts due to a limitation of the library used to generate the preview.
