Closed Issues.....5

Known Issues..... 5

New features

This release contains no changes in new features.

Changes in Functionality

This release contains no changes in functionality.

Changes to third-party libraries

This release contains no changes to third-party libraries.

Closed Issues

This release contains the following closed issues:

- **[DINT-4397]** Large Excel files cannot be imported at the dataset level.
- **[DINT-4669]** An error displays when importing a CSV file using a template where the default value of Concatenate String transformation is an empty string.

Known Issues

This release contains the following known issues:

- A JNDI data source cannot be configured when EBX is deployed on a WebLogic, or JBoss server.
- When exporting to SQL with TDV, if any error occurs, the operation is cancelled.
- Due to a limitation in Excel, long fields with the number data type display all numbers past the 16th place as a 0.
- Importing and exporting SQL: Read and write is not possible with the Timestamp data type with MS SQL Server.
- Configuring a schema using the JNDI configuration in your web server is not supported.
- When creating a custom transformation function, you must use a predefined data type for its input and output fields.
