*Version 6.2.1
March 2025*

Table of contents

New features.....5

Changes in Functionality..... 5

Changes to third-party libraries..... 5

Closed Issues.....5

Known Issues..... 6

New features

This release contains the following new features:

- The following updates were made to enhance user experience:
 - The add-on's line, column, and stacked column charts now include a horizontal scroll bar. This allows you to seamlessly view more results for indicators executed over longer periods of time.
 - The multi-row card charts now include a re-sizeable column, which allows you to adjust the width to display full data values.
- It is now possible to export a PDF file of a dashboard. Exported PDFs replicate the structure of the dashboard, with each section containing the corresponding indicators displayed at the time of export.
- The **F22 - String length distribution** indicator now provides a parameter that allows you to determine whether to include white spaces in the length calculation.

Changes in Functionality

This release contains no changes in functionality.

Changes to third-party libraries

This release contains no changes to third-party libraries.

Closed Issues

This release includes the following closed issues:

- **[DPRA-1082]** The **Text** property's color picker is overlaid by the task bar.
- **[DPRA-1892]** The scroll bar moves too fast to be able to click on the legend.
- **[DPRA-2068]** The message "No data available" does not display when users do not have sufficient permission to view an indicator's asset.
- **[DPRA-2120]** An indicator that uses the **Distinct value count** function cannot be created when linked records are enabled.
- **[DPRA-2126]** The preview does not display consistently when changing the char type.
- **[DPRA-2159]** Indicator results do not display after removing the legend position.
- **[DPRA-2354]** The loading screen displays continuously when running profiling from a table that contains a foreign key node with multiple values and links to a table with a composite primary key.
- **[DPRA-2392]** The chart's legend display is inconsistent with the result legend.
- **[DPRA-2393]** The chart's legend display is inconsistent between the dashboard and data profiling.
- **[DPRA-2398]** After re-selecting a function when creating an indicator, the previous function description still displays.
- **[DPRA-2403]** The system does not apply permissions when they are changed on a user's dashboard.

- **[DPRA-2613]** Executing the T03 indicator function can cause other indicators configured on computed values to fail when the indicators are executed at the same time.
- **[DPRA-2624]** The values on the X-axis of a bar chart overlap.

Known Issues

This release contains the following known issues:

- The following data types are not currently available for indicators to monitor:
 - multi-value foreign keys
 - associations
 - multi-value groups
- Validation of configuration data after importing it from an archive file is not supported.
