New features

The add-on was updated to ensure compatibility with the latest release of TIBCO EBX® and the Add-on Bundle version 6.2.1.

Changes in Functionality

This release includes no changes to functionality.

Changes to third-party libraries

This release contains no changes to third-party libraries.

Closed Issues

This release contains no closed issues.

Known Issues

This release contains the following known issues:

- Search can execute on all field types except linked fields and labels of foreign keys or enumerations.
- Search with computed values or inherited fields might lead to performance issues.
- The use of keywords that contain only special characters is not supported.
- Search input is limited to 1001 characters.
